

Special Steel Burrs for Premium Grinding

Engineered for Excellence: The Stainless Steel Advantage

Central to our grinder’s performance is the stainless steel burr, a marvel of modern engineering. These burrs are not just any metal; they’re a special grade of stainless steel chosen for their durability, corrosion resistance, and ability to maintain sharp edges for consistent grinding.

Technical Features

Grinding Burr	100 cm Steel
Body Material	Cast Aliminum
Engine Power	1100 W<
Volatge	220 V
Frequency	50 – 60 Hz
Dimensions	30*40*80 cm
Weight	45 Kg

Thanks to its vertically positioned motor, unlike other mills, it can grind the desired type of coffee beans (Turkish coffee, espresso, filter coffee) repeatedly without leaving any residue inside. It has 100 mm diameter steel blades.

GRINDING CAPACITY

- ✓ 30 kg/hour - Turkish coffee
- ✓ 50 kg/h - Espresso
- ✓ 70 kg/h - Filter Coffee

Commercial Efficiency: The 100 mm Burr Set

In bustling cafes and high-demand environments, time is of the essence. Our 100 mm burr set is tailored for commercial use, striking the perfect balance between speed and precision. These burrs can handle high volumes of grinding without compromising on consistency or quality.
