Origin: **China**

### Description:

The juice dispenser has three transparent containers that can hold a total of 48liters of liquid. Equipped with three taps, the drinks can be conveniently filled and mixed with each other. Due to the large capacity, the beverage dispenser is ideal for large events - such as at fairs, street festivals or food festivals. Two rotating paddles are integrated into the containers, which, in addition to cooling, constantly mix the drinks if desired for a unique customer experience.
