Description:

The 60-star STAR electric salamander is a useful tool for heating and roasting food and especially for melting cheese on snacks, steaks, hot dogs, hamburgers, etc. in fast food and industrial kitchens.

One of the important features of this device is that it works without oil, which is very effective in choosing a salamander.

It should be mentioned that this product does not need gas because it is electric and has no smoke and is suitable for covered and small places that are not allowed to use gas.

The 60-star STAR electric salamander has the ability to cook grilled fish, barbecue, eggplant, and mushrooms.

Also, this product has the ability to adjust the height in four different modes, and you can increase or decrease the height based on your needs and the food you have.
