Origin: **China**

### Description:

Milkshaker has been specifically designed for use in professional areas such as restaurants, cafes, bars, clubs, ice cream shops and gyms. Thanks to its power of 80 W at a rotation speed of up to 15,000 rpm, it mixes effortlessly in addition to creamy shakes, fruity or creamy cocktails, even nutritious protein shakes. Thanks to its flexibility, high-quality workmanship and practical design, the milk shaker is an absolute must-have for your catering company.

The blender has a cup locking system, which allows the user to attach and remove the cup comfortably and intuitively to the stand. At the same time, this suspension ensures a secure fit during the mixing process.
